Introduction

The School Performance Report 2025 presents a comprehensive account of student achievement in the Board Examinations conducted in 2025 for Classes VI, VIII, X, XII - including LCSC (X & XII). It provides detailed information on the number of students registered and appeared for the examinations, together with a systematic analysis of their performance across subjects. The report reflects the academic attainment of students at key stages of schooling and serves as an important reference for monitoring the quality, effectiveness, and equity of teaching and learning across schools.

The report presents Dzongkhag-wise and school-wise performance in each subject using key statistical indicators such as mean scores and standard deviation. These indicators provide meaningful insights into the overall level of student achievement as well as the degree of consistency or variation in performance. Such analysis enables schools and education stakeholders to identify strengths, pinpoint learning gaps, and better understand performance trends at national, Dzongkhag, and school levels.

In addition, the report outlines the passing criteria for the various examinations and provides detailed information on student performance across different assessment components, including continuous assessment, practical examinations, and theory papers. These processes collectively ensure valid and credible assessment of candidates' achievement, particularly at the end of Classes X and XII, which lead to the award of national qualifications as Bhutan Certificate for Secondary Education (BCSE) and Bhutan Higher Secondary Education Certificate (BHSEC) respectively.

This report promotes transparency, accountability, and data-informed decision-making across the education system. It serves as a valuable resource for teachers, principals, Dzongkhag education officers, and policymakers to monitor progress, guide resource allocation, and implement strategies that foster equitable access to quality education and improved student achievement. Schools are encouraged to use this report not merely as a record of performance, but as a strategic tool to drive continuous improvement and educational excellence.

Furthermore, the report is intended to support schools in undertaking systematic, evidence-based analysis of their performance. Schools are strongly encouraged to review their subject-wise and overall results, identify areas requiring improvement, and implement targeted interventions to address identified gaps. The findings should inform the development and implementation of comprehensive School Improvement Plans (SIP) aimed at strengthening instructional practices, enhancing assessment literacy, and improving student learning outcomes.

It is important to note that this report is primarily based on examination data and therefore should not be viewed as the sole determinant of school performance. While it provides valuable evidence and indicative trends, it does not capture all contextual factors that may influence learning outcomes. Schools are encouraged to complement these findings with additional qualitative and contextual analyses, including classroom practices, learner characteristics, resource availability, and school-level initiatives, to gain a more comprehensive understanding of performance and to support deeper, in-depth improvement planning.

The Bhutan Council for School Examinations and Assessment (BCSEA) remains committed to upholding the highest standards of validity, reliability, fairness, and integrity in all assessment and reporting processes, and to ensuring that the information provided contributes meaningfully to strengthening the quality of education in the country.

Controller of Examinations

SECTION A: BHUTAN HIGHER SECONDARY EDUCATION CERTIFICATE (CLASS XII)

A.1 General Information

A total of 9330 candidates from 81 Higher Secondary Schools (71 Government and 10 Private) registered and 9261 appeared the examination. The overall pass percent is 77.87%

REGISTERED			APPEARED			PASSED			PASS %		
M	F	T	M	F	T	M	F	T	M	F	T
4227	5103	9330	4184	5077	9261	3309	3903	7212	79.09	76.88	77.87

A.2 Subject / Paper-wise Performance

The table below shows the overall subject/paper-wise performance in terms of pass percentage, mean, and standard deviation.

C.4 School Performance Based on Subject Mean

The table below shows the performance of schools in each subject.

DZONGKHA I

The Royal Academy under Paro Dzongkhag secured the highest mean score of 88.41.

Conclusion

The 2025 Board Examination results reflect overall stable student performance with gradual improvements observed across several subjects and levels. The outcomes indicate the continued impact of strengthened teaching–learning practices, improved assessment processes, and enhanced quality assurance measures. While many students demonstrated satisfactory achievement, variations in performance across subjects and learner groups highlight the need for targeted academic support, data-driven interventions, and sustained capacity building for schools and teachers. The findings from this report will guide future policy decisions, refinement of assessment strategies, and ongoing reforms aimed at improving equity, reliability, and learning outcomes within the national education system.
